

Lilley (4)

ANNUAL REPORT OF THE MEDICAL OFFICER
OF HEALTH FOR THE YEAR 1956.

I present the Vital Statistics of the Urban District for 1956, compiled from figures supplied by the Registrar General.

The estimated mid-year population was 2,460.

Deaths	Total 31	Male 10	Female 21
--------	----------	---------	-----------

Live Births	Total 27	Male 14	Female 13
-------------	----------	---------	-----------

Still Births	Total 3	Male 2	Female 1
--------------	---------	--------	----------

The crude Death Rate is 12.6 per 1,000.

The crude Birth Rate is 10.97 per 1,000 live births.

The adjusted figures are:- Death Rate 9.7

Birth Rate 12.95

These figures are obtained by multiplying the crude rates by the "comparability factors" supplied by the Registrar General.

The causes of death were:-

Malignant disease of various organs	7
Vascular diseases of the nervous system	8
Coronary disease - angina	1
Other diseases of the heart	6
Other circulatory disease	2
Pneumonia	1
Bronchitis	1
Other infective disease	1
Ulcer of stomach or duodenum	1
Accidents (one motor accident)	3

Of these deaths 13 occurred in various hospitals.

The age groups are:-

15 - 44	1
45 - 54	1
55 - 64	3
65 - 74	10
75 - 84	12
85 and over	4 (3 being over 90)

There were no deaths of infants under one year of age.

E.C. IRONSIDE
Medical Officer of Health.
